

Jayson C. Sepeda

sepedajayson01@gmail.com | 09303865907 | [Portfolio](#) | Manila, Philippines

Magna Cum Laude Computer Science graduate with proven expertise in Full-Stack Development (MERN, Flask/React). I possess hands-on experience delivering full-cycle software projects, including building scalable systems and engineering robust API endpoints. My skills span the MERN stack, Flutter/Dart mobile development, and an understanding of enterprise-level Quality Engineering, ensuring high-quality, testable code from architecture to deployment.

Education

Pamantasan ng Lungsod Ng Maynila

September 2021- November 2025

Bachelor of Science in Computer Science | GWA: 1.44 | Magna Cum Laude

Core Skills

- **Programming:** Java, Groovy, C, C++, Python, Dart, HTML, CSS, JavaScript, Basic Unix Scripting
- **Enterprise Tools:** Git/GitHub, Katalon Studio, Jira, Confluence, Salesforce, Bruno, Postman, Microsoft Dynamics 365, Azure Cosmos DB, Dbeaver, Oracle, Looker Studio, Google Apps Script,
- **Application/Software Development:** React, Django, Flask, Flutter, Express, Spring Boot, Node, MySQL, MongoDB, AppSheet
- **Soft Skills:** Problem-solving, Analytical Thinking, Team Collaboration, Time Management, Quick Learner.

Key Achievements & Published Works

- **Best Abstract Award Winner** - 1st ASEAN Multidisciplinary Research Conference 2024 (International Society of Transdisciplinary Researchers, Educators, and Leaders Inc.)
- **Published Author** - *Enhancement of Gated Recurrent Unit for Speech Emotion Recognition in the Implementation of Voice-Based Danger Recognition System* (Published at United International Journal for Research & Technology, Indexed on Google Scholar and ResearchGate)
 - DOI: <http://dx.doi.org/10.13140/RG.2.2.1381.26085>

Experience

Quality Engineer Intern | Manulife

September 2025 – December 2025

- Completed an intensive 2-week Software Engineering training program focused on JavaScript, ReactJS, Apollo GraphQL, Node.js, REST APIs, Database Migration, AI tooling, Unit Testing, Agile-Scrum methodology, Design Thinking, and Application Architecture.
- Performed both manual and UI/API automation testing for the CWS KLO project, specifically using Katalon, Salesforce, Microsoft Dynamics 365, Azure Cosmos DB, and Bruno.
- Wrote and utilized Groovy scripts to support and execute automated workflows.
- Executed test cases, logged detailed defects with evidence, and managed the defect tracking/documentation lifecycle using Jira and Confluence following QE standards.
- Actively participated in Agile ceremonies and collaborated with cross-functional teams (developers, leads, BAs) to clarify requirements and reproduce issues.

Application Developer Intern | Third Generation Holdings Corporation

July 2024 – August 2024

- Built an internal document request, retrieval, and form-creation application in AppSheet, leading to reduced manual work and streamlined operations.
- Automated document-generation workflows with Google Sheets and Apps Script, which successfully cut manual labor by approximately 50%.
- Created dynamic dashboards and reports in AppSheet and Looker Studio to enhance reporting efficiency.
- Customized forms and backend workflows to optimize data entry and retrieval, and provided cross-department IT support.

Projects

VAWC Deskhub | Full-Stack Developer

September 2025 – December 2025

Tech Stack: MongoDB, Express, Node, React

- Developed a full-stack MERN platform that enables victims of VAWC to file detailed and optionally anonymous abuse reports.
- Engineered the authentication and authorization workflow using JWT tokens and bcrypt encryption to ensure

- secure login and role-based access control.
- Designed and implemented two user roles (User and Admin/Barangay Agent) and engineered backend API endpoints for handling users, cases, and authentication.
- Structured MongoDB collections to manage user profiles, reports, and case updates, ensuring efficient data storage and retrieval.

**Gated Recurrent Unit (GRU) Voice-Based
Danger Recognition System | Lead Programmer**

May 2024 – May 2025

Programming Language, Software & Framework: Python, Kaggle, Flask, React-Vite

- Built a GRU-based neural network model to classify six emotional states from speech signals , improving base model accuracy via targeted enhancements.
- Developed a full-stack system using React and Flask that processes live mic input for real-time emotion classification.
- Implemented backend logic to specifically detect the "fear" emotion and trigger a danger-recognition alert.
- Handled dataset selection, preprocessing, data-splitting, and wrote the research manuscript for academic publication (as Published Author).

**Mobile Application Development (Renacimiento App &
PLM App) | UI/UX & Lead Frontend Developer**

March 2024 – June 2024

Software Development Kit & Programming Language: Flutter & Dart

- Led the UI/UX design process, creating detailed wireframes, low-fidelity, and high-fidelity designs in Figma.
- Spearheaded frontend development using Flutter and Dart, translating Figma designs into fully functional, responsive mobile interfaces.
- Developed modular and reusable UI components to ensure maintainability and structured the codebase for seamless full-stack integration.
- Managed team meetings and client check-ins and participated in QA, helping to document and resolve bugs and UI/UX inconsistencies.

Licenses and Certifications

- | | |
|--|---------------|
| CS50’s Introduction to Computer Science (Harvard University) | December 2025 |
| Artificial Intelligence Fundamentals (IBM) | July 2025 |
| Python Essentials 1 (CISCO Academy) | July 2025 |
| Introduction to Cybersecurity (CISCO Academy) | March 2023 |
| Cybersecurity Essentials (CISCO Academy) | April 2023 |
